BNSP-certified as a System Analyst and Certiport IT Specialist in HTML & CSS, with experience in designing user interfaces (UI) and user experiences (UX) for government, academic, and software development projects. Experienced in user research, wireframing, high-fidelity mockups, interactive prototyping, usability testing, and implementing Design Systems using Figma. Able to collaborate with developer teams to deliver intuitive digital solutions focused on user needs.

Work Experience

Evolution IT – Yogyakarta, Indonesia

February 2026 – March 2026

Frontend Developer

- Developed and optimized the User Interface (UI) of a web-based employee attendance system using Laravel (Blade), ensuring a responsive, precise, and user-friendly interface.
- Reconstructed and modernized the user interface (UI migration) from PHP Native to modern Laravel components, with a focus on maintaining consistency in layout, typography, and visual hierarchy.
- Actively collaborated within the team to translate system requirements into interactive elements to streamline the user workflow.

Dinas Komuikasi dan Informatik Kabupaten Bantul – Yogyakarta, Indonesia

February 2025 – April 2025

User Interface Design

- Designed 30 interface pages for the Bantul Regency dashboard using Figma as part of a team consisting of 2 UI Designers, resulting in a more modern, consistent, and easy-to-understand interface to support the delivery of public information.
- Conducted research and analyzed public information needs to be transformed into an efficient Low-Fidelity wireframe structure.
- Developed wireframes into high-fidelity mockups in Figma by implementing a Design System, including consistency in colors, typography, spacing, and interface components according to institutional standards. Developed wireframes into high-fidelity mockups by implementing a Design System, ensuring consistency in colors, typography, spacing, and interface components across all pages.
- Collaborated with 2 developers to ensure the interface implementation aligned with the designs created, resulting in a more efficient development process and minimizing design revisions.

Education

Universitas Muhammadiyah Yogyakarta – Yogyakarta, Indonesia

August 2022 - Present

Information Technology, GPA (3,75/4,00)

- Developed competencies in UI/UX Design, system requirements analysis, and software testing through coursework and academic projects..
- Applied user research, wireframing, mockups, interactive prototyping, usability testing, Black Box Testing, and User Acceptance Testing (UAT) in both individual and team projects.
- Collaborated on software development projects using an Agile approach, enhancing communication, teamwork, and problem-solving skills.

Project Experience

Kafe Kala – Mobile Application UI/UX Design

August 2026

UI/UX Designer

- Designed a mobile application for Kafe Kala to help users browse menus, place orders, and access café information through an intuitive interface.

- Conducted user research and created the Information Architecture (IA), User Flow, wireframes, and high-fidelity designs using Figma.
- Applied user-centered design principles to improve navigation, visual hierarchy, and overall usability.
- Developed an interactive prototype to validate user flows and support the development process.

MarketChain – Retail & Retail Demand Analytics Business Simulation (Final Project)

Jan 2026 – Juni 2026

Full-Stack & UX Designer

- Developed the Retail and Retail Demand modules for a web-based business simulation platform to support retail management processes and sales data analysis.
- Implemented retail processes including branch, vendor, procurement, inventory, and sales transaction management.
- Developed an analytics dashboard presenting visualizations of sales performance, best-selling products, demand per branch, and insights based on transaction data.
- Applied the Agile methodology and conducted testing using Black Box Testing and User Acceptance Testing (UAT) to ensure system quality and acceptance.

Dompet Warga – Mobile Application for Neighborhood Financial Management

January 2026 – June 2026

UI/UX Designer

- Designed 100 wireframe and high-fidelity mockup pages using Figma for 2 user roles (Admin and User), ensuring that all main application flows were well documented before the development stage.
- Independently developed an interactive prototype as an implementation reference, making it easier for the developer team to understand interaction flows and design specifications.
- Collaborated with 2 team members to conduct usability testing with 10 respondents to identify interface issues and develop improvement recommendations to enhance the application's ease of use before implementation.

Website IMM FH UMY

June 2025

UI/UX Designer

- Designed the information structure and layout of the organization's Home page using WordPress as part of a 2-member team, resulting in a more structured and easy-to-understand interface for users.

Organizational Experience

Keluarga Mahasiswa Teknologi Informasi - Yogyakarta, Indonesia

Oktober 2023 – July 2024
